Let us deep dive in the Challenge!

CONTEXT

- **Developing CACEIS' Human Capital** is the Human Resources' department main mission
- Competences, skills, know how and contribution of our employees to the company's results are **only reflected as a cost** in the company's accounts
- Sponsorship by **Jean-Pierre Michalowski** along **Julien Maze** and **Carine Echelard**

CONCEPT

- Identification of **a strategy & valuation methods** (including measurable indicators) which CACEIS should develop to demonstrate its performance on the development of the CACEIS human capital and not considering it only as "a cost"

DELIVERY

- **Literature and market study** describing existing possible Human Capital valuation methodologies (including pros and cons)
- **Recommendation of a valuation methodology** applicable to CACEIS using available data

Let us deep dive in the Challenge!

How can we value CACEIS's human capital in a way that goes beyond simply viewing it as a cost center by developing a valuation methodology that leverages Artificial Intelligence?

1. Define a rigorous methodology for collecting and analyzing HR data.
2. Design a relevant methodology for valuing human capital.
3. Prototype an AI solution capable of generating this methodology and potentially providing recommendations (incorporating ethical considerations, GDPR compliance, and governance principles).

No more suspens… It's time to reveal the data!
